GeoStrata LLC (GeoStrata) has provided engineering and geologic consulting and materials testing and inspection services since July of 2001. GeoStrata is headquartered in Bluffdale, Utah. GeoStrata is certified as a Disadvantaged Business Enterprise (DBE) by the Utah Unified Certification Program (UUCP).

Since inception of the company, quality services have been our highest priority. To deliver this quality service, GeoStrata provides the proper training, equipment and certifications required to meet all of our clients needs. GeoStrata has created a service-based company where the needs of our clients guide our company priorities.

Geologic Services:

- Engineering geology
- Geologic hazards assessments
- Economic geology including
- Environmental geology
- Geophysical investigations (electric resistivity, seismic reflection and refraction, ground penetrating RADAR, magnetometer, and down-hole geophysics and 3-D digital televising)

Engineering Services:

- Geotechnical engineering
- Geotechnical laboratory testing
- Geological engineering
- Mining engineering
- Environmental engineering

Materials Testing and Inspection Services:

- Soil density testing
- Soil, concrete, masonry and asphalt sampling and testing
- Concrete and Asphalt mix designs
- Reinforced concrete, masonry, fireproofing, and structural steel special inspection
- geo-membrane liner inspection
- Expert witness for material related concerns

Our laboratory has capabilities to perform nearly all soils, concrete, masonry and asphalt testing. Along with individual certifications, GeoStrata has completed all reviews, audits and split proficiency sample testing and independent assurance testing for certifications in the laboratory. These certifications include the American Association of State Transportation Officials (AMRL), and the Cement and Concrete Reference Laboratory (CCRL). GeoStrata's certifications can be viewed in the AASHTO R18 directory on the AMRL website located at (<http://amrl.net>). The GeoStrata laboratory is also certified by UDOT and the Army Corps of Engineers.

GeoStrata has more than 10 field technicians, inspectors and laboratory technicians to perform materials testing and inspection services during construction. These individuals are highly qualified and certified by ACI, UDOT TTQP, and ICC. Their experience includes projects in both vertical and horizontal construction. Visit our company website www.geostrata-llc.com for additional information about GeoStrata.
